On December 17, 1903, after many years of research, Wilbur and Orville Wright made the first powered controlled flights in an airplane.

Today, Leesburg Regional Airport is just one of many airports which connect business and pleasure travelers with amenities including:

- Chain restaurants & hotel onsite and nearby
- Courtesy van
- Car rentals
- Aviation and jet fuel
- Repair and maintenance facilities
- Hanger rental
- Flight instruction
- Land available for development

Leesburg Regional Airport

Unprecedented growth in aviation at Leesburg Regional Airport, (located northeast of Orlando, Florida), has made it a success story in its own right, while mirroring the region's own astonishing growth.

Today, facilities' improvements are ongoing, as we maintain the high standards we have set for both our facilities and service.

Located just six miles from Historic Downtown Leesburg and its primary business district, one mile from Lake Square Mall, and within minutes of world-class fishing, golfing and Central Florida attractions, Leesburg Regional Airport is a great place to land.

For your comfort, you'll find a pilot's lounge and supplies, rental car and courtesy van service, long-term and overnight tie-down rentals, corporate hanger, and T-Hanger Rental. Onsite aircraft sales and rentals. The Microtel Hotel is just a hop away, and both Ruby Tuesday and Cracker Barrel restaurants are on site. Many other restaurants are close by.

SunAir Aviation, the airport's fixed-base operator, is open daily (including holidays) from 7 a.m. – 7 p.m. Self and full-service 100LL Octane aviation fuel and full-service jet A fuel are available.

Try our avionics shop for instruments, auto pilot, major engine repairs, maintenance and composite repair. Flight instruction is also available.

For those interested in starting a business in this thriving area, land is available for aeronautical industries and commercial frontage is available for other development. Full service utilities run throughout the airport property.
