TASER International is the only ECD (Electronic Control Device) manufacturer who has an extensive mechanical engineering, electrical engineering, and technical staff that all contain the requisite comprehensive and technical knowledge and expertise essential in manufacturing these highly technological electronic control weapons.

TASER International's ADVANCED TASER M26 and X26 are the most extensively studied less lethal weapons on the market today. TASER International is the only weapons company in the world with both a scientific and medical advisory board comprised of world-class experts who provide critical insights to help the company design and test the safest devices possible.

These are some of the unique features the ADVANCED TASERS M26 and X26 have that are not found with other Electronic Control Devices:

The ADVANCED TASER M26 and X26 are the only less-lethal ECD weapons systems that can stop an aggressive, focused, combat trained attacker.

The ADVANCED TASER M26 and X26 are the only less-lethal ECD weapons systems that are compatible with the X-rail, a universal mount that will mount to anything with a Picatinny rail and utilizes a quick release mechanism to allow the user to carry either less lethal below their lethal weapon.

The ADVANCED TASER M26 and X26 directly stimulate motor nerve and muscle tissue, causing incapacitation regardless of mental focus, training, size, or drug induced dementia.

The ADVANCED TASER M26 comes with an on-board memory chip to download 585 past firings based on the time and date the unit was fired.

The TASER X26 comes with an on-board memory chip to download 2,000 past firings based on the time and date the unit was fired to protect officers from unfounded charges of misuse of force.

The ADVANCED TASER M26 and X26 have over 94.9% field effectiveness rating.

The ADVANCED TASER M26 and X26 use the same hand motions and muscle memory as standard 9 mm semi-automatic pistols, drastically reducing the amount of time required to train. User training and Instructor training materials are all on CD-Rom for ease of reproduction for training.

The X26 uses proprietary Shaped Pulse™ EMD Technology with high performance, highly efficient, incapacitation effect that's 5% greater than the ADVANCED TASER M26, and is 60% smaller, 60% lighter, and consumes 1/5th the power of the M26.

The X26 has an optional upgrade system, the TASER Cam which records over an hour of MPEG4 video and audio data to provide another layer of accountability to corroborate officers use reports.

The Lithium Battery System for all X26 Units is the DPM - Digital Power Magazine (26700), XDPM - Extended Digital Power Magazine (26701) and the rechargeable TASER Cam (26750). (All battery systems are rated up to *195 5-second firings at room temp.)

The Extended Warranty Lithium Battery System for all X26 Units is the 1 year (26711) and 4 year (26714) DPM - Digital Power Magazine and the 1 year (26721) and 4 year (26724) XDPM - Extended Digital Power Magazine. (All battery systems are rated up to *195 5-second firings at room temp.)

Propulsion System for all air cartridges is compressed nitrogen (1800 to 2500 lbs/in²).
