RE: **MAIN WATER TREATMENT PLANT PIPING INTERCONNECT**
(BESH #031111.0008)

Dear Mr. Purvis:

Please find attached a change order from CenState Contractors, Inc., for the above project. As we have discussed, the existing water line to which we are connecting at the north end of the site was detailed on the plans as a 24" line, based upon information provided by the City of Leesburg. However, upon beginning work, it was discovered that this line is in fact a 20" line. Therefore, it was necessary to return the 24" materials and replace them with 20" materials. However, based upon conversations with the Contractor, the 24" tapping sleeve is a specialty item and is non-returnable.

Based upon our review of the letter from CenState Contractors, Inc., we would recommend approval of the Change Order in the amount of \$11,085.92, with two conditions:

1. CenState provide to the City a letter from their materials supplier stating that the item is non-returnable.
2. CenState provide the already purchased 24" tapping sleeve complete, to the City of Leesburg, for use elsewhere in the system.

Once CenState has provided this information, I would recommend approval of said Change Order.

Should you have any questions with regards to this matter, please do not hesitate to contact me at (352) 343-8481.

Sincerely,

BOOTH, ERN, STRAUGHAN & HIOTT, INC.

Re: **Main Water Treatment Plant Piping Interconnect**
City of Leesburg Project No. LB-06-02 - Your Job No. 031111.0008

Dear Mr. Ern:

In my phone conversation with Mike Pendergast on December 20th, we discussed your need for a detailed breakdown of our price quote for the change in material size.

On the attached, you will find a list of 24-inch fittings and prices versus the 20-inch. Also, you will find the cost of the tapping sleeve, restocking fee, and freight charges for the return of the 20-inch fittings.

If you have any questions, please contact me.

Sincerely,

R- Blackwell
