2010 Griffin Road
Leesburg, Florida 34748

Subject: Confirmation of scope of work/ high level budgetary estimate and funds request

Dear Mr. Paul Kalv:

Good day! It was a pleasure to meet with Rick Reichert, Steve Davis, and you during the morning of today.

As requested, please receive confirmation of a high level budgetary estimate for total project costs at \$3,200,000.00. These dollars are to fund the relocation of the CFLE-2 69kV transmission line from; (A) its current corridor and then south on US27, to the Center Leesburg Substation thereabout, to (B) from its current corridor and then south on Thomas Road to the old rail road track owned by the City of Leesburg, to the Center Leesburg Substation thereabout.

In addition, we now need to fund the necessary detailed engineering with the \$100,000.00 previously discussed. These funds are to be used for soil boring analysis, ground penetration radar studies, real estate investigation (including critical transitions through the rail road track), and other engineering criterion . Please have these engineering funds sent to my attention via check at your earliest convenience and as per my directory included below.

Since we are looking at a relatively near-by completion date before the May 2010 date, due diligence is required as time is of the essence.

Very kindly and respectfully yours,

A handwritten signature in blue ink, appearing to read 'Luis A. Huertas', with a stylized flourish extending to the right.
