Leesburg, Florida 34749-1357

**Annexation**

(Vickie Woods Hypes)

RESERVED FOR RECORDING

**THIS AGREEMENT** entered into as of the \_\_\_\_\_ day of \_\_\_\_\_, 2009, between **THE CITY OF LEESBURG, FLORIDA**, P.O. Box 490630, Leesburg, Florida 34749-0630, hereafter referred to as the "City," and Vickie Woods Hypes, whose address is 32649 Vista Avenue, Leesburg, Florida 34748, hereafter referred to as the "Developer,"

**WITNESSETH:**

That Developer owns the real property legally described on Exhibit "B" attached, and has applied to annex that property (hereafter referred to as the "Property") into the City. The parties have entered into this Agreement to set forth certain understandings between them regarding how the Property is to be developed, and which party will be responsible for various expenses connected to the use and development of the Property, if it is annexed into the City and subsequently developed.

**NOW THEREFORE**, for and in consideration of the mutual covenants and promises contained herein, and of the consideration being given by the City to annexation of the Property into its municipal limits, as well as other good and valuable considerations, receipt whereof is hereby acknowledged, the parties do hereby agree as set forth below:

1. The Developer has requested that the Property be annexed into the City and that it be given a zoning classification of City RP (Residential Professional).
2. The total land area of the property is approximately .22 acres and the general location on the west side of east of Vista Avenue north of U.S. Highway 441, south of Shademoor Drive.
3. All wetlands on the project site shall be identified and the location and extent of each wetland shall be determined by St. Johns River Water Management District and/or U.S. Army Corp of Engineers. Each wetland shall be placed on a suitable map, signed and sealed by a surveyor registered to practice in Florida and shall be submitted as part of the preliminary plat application.
4. Buildings or structures shall be a minimum of 50 feet from any wetland jurisdiction boundary.

5. If wetland alteration is permitted by St. Johns River Water Management District, wetland mitigation shall be required in accordance with permit approvals from St. Johns River Water Management District.

6. A wildlife/historical/archaeological management plan for the project site, if applicable, shall be prepared based on the results of the environmental permit approvals obtained from applicable governmental agencies. The management plan shall be submitted to the City as part of the preliminary plan application. The Permittee shall designate a responsible legal entity that shall implement and maintain the management plan.

7. To the extent practical, wetlands shall be placed in a conservation easement, which shall run in favor of, and be enforceable by, St. Johns River Water Management District or another legal entity such as a homeowners association. The conservation easement shall require that the wetlands be maintained in their natural and unaltered state. Wetlands shall not be included as a part of any platted lot, other than a lot platted as a common area, which shall be dedicated to St. Johns River Water Management District or another legal entity such as a homeowners association for ownership and maintenance.

8. Developer shall bear all responsibility, financial and otherwise, for the construction and installation of the following utility infrastructure and other improvements related to the use and development of the Property, all of which shall be constructed to the applicable specifications imposed by the ordinances and regulations of the City in effect at the time of construction. Developer shall dedicate on the plat, or otherwise grant to the City, free of liens or encumbrances other than those which are duly subordinated, easements for water, reuse water, and sewer lines and all other utilities mentioned herein, and shall upon approval of the lines by the City, convey title to all utility lines and related infrastructure (such as, but not limited to lift stations) to the City by deed, bill of sale or other appropriate document. The City shall not be obligated to accept for maintenance any utility lines, roads or other items constructed by the Developer which do not meet the specifications and requirements pertaining thereto as set forth in applicable laws, rules and regulations in effect at the time of construction.

- A. All interior roads, together with such turning lanes, acceleration and deceleration lanes, traffic signals, signs, striping, and other road improvements, on site or off site, as are necessary to the efficient handling of the traffic to be generated by the proposed development of the Property, and to meet the concurrency requirements imposed by law. Roads and other public thoroughfares within the Property shall be dedicated to the public on the plat or in some other manner, unless Developer desires and intends that the roads remain private, in which case the plat, recorded restrictions or other appropriate documents shall contain notice to all purchasers of land within the Development that they, and not the City, will be responsible for maintenance of the roads.
- B. All supply lines for potable water service to each residential, commercial or industrial unit constructed on the Property. This shall include the responsibility to construct such off site lines as are necessary to hook the Property onto the City's potable water system at the nearest location where there is a supply line of sufficient size to serve the needs of the proposed development.

- C. Separate water supply lines to carry treated wastewater ("Reuse Water") to be utilized for irrigation and other purposes for which the use of Reuse Water is approved by applicable laws, rules and regulations. This shall include the responsibility to construct such off site lines as are necessary to hook the Property onto the City's reuse water system at the nearest location where there is a supply line of sufficient size to serve the needs of the proposed development.
- D. Natural gas lines to supply each structure constructed on the Property with natural gas. This shall include the responsibility to construct such off site lines as are necessary to hook the Property onto the City's natural gas supply system at the nearest location where there is a supply line of sufficient size to serve the needs of the proposed development. Developer shall be responsible for the installation of a natural gas water heater and natural gas furnace in eighty percent (80%) of all homes in the development.
- E. Wastewater lines and any necessary lift stations to convey wastewater from each structure on the Property to the City's wastewater treatment system. This shall include the responsibility to construct such off site lines as are necessary to hook the Property onto the City's wastewater treatment system at the nearest location where there is a collection line of sufficient size to serve the needs of the proposed development.
- F. Electrical transmission lines shall be placed underground to serve each structure on the Property. If the Property is not within the City's electrical service area, the requirement to convey the electrical supply lines to the City shall not apply, however Developer shall still be required to dedicate easements sufficient in size and location for the placement, maintenance, repair, upgrade and improvement of the electrical supply system by the utility in whose service area the Property is located.
- G. Fiber optic cables to serve each structure constructed on the Property with data and other services capable of transmission over such lines. Provided, however, this requirement is only applicable if the City's fiber optic cable system is available adjacent to the Property at the time of construction/improvement plan approval by the City.
- H. If in its discretion the City desires to have any of the foregoing utility lines oversized for any reason, such as but not limited to serving future development, it may require Developer to install the oversized lines but the City shall pay the difference in cost between the lines which would have been adequate to serve the Property, and the cost of the oversized lines required by the City.

9. At the time of building permit approval, or other time as specified by City or Lake County ordinance, Developer shall pay all applicable impact fees, connection charges, or other legally adopted fees and costs required by the City or Lake County.

10. Nothing in this Annexation Agreement shall be construed to exempt the Developer or the Property from any requirements imposed by the City code or other applicable laws, rules and regulations regarding any permits or approvals necessary for the anticipated development of the

Property, including but not limited to, platting, building permits, zoning or conditional use permits or amendments to the Future Land Use Element of the Comprehensive Plan as required for the uses to which Developer proposes to put the Property, site plan approvals, or other permitting requirements imposed by local, state or federal government, or any agency thereof.

11. Developer understands and acknowledges that by entering into this Annexation Agreement, the City is not committing to approve any aspect of the proposed development of the Property, or to do any other act which requires public hearings or approval by the City Commission or other agency or body of the City such as the Planning Commission. All decisions regarding zoning, land use, permitting, and other such approvals, must be made by the body having jurisdiction over such decision under applicable law, and in accordance with all public hearing and participation requirements now or hereafter in effect. This Annexation Agreement shall not be effective, nor shall it be binding on either party, until such time as the Property has been duly annexed into the municipal limits of the City in accordance with all applicable requirements including notice to surrounding property owners and public hearings which are in accordance with Florida Statutes, and the City's Code of Ordinances. The City does not, by negotiation of this Annexation Agreement with the Developer, intend to commit itself to annex the Property, and shall not be obligated to do so. However, if the City denies Developer's petition to annex the Property into its municipal limits, this Annexation Agreement shall become void and of no force or effect once the decision of the City Commission to deny the petition to annex has become final and is no longer subject to appeal.

12. Venue for any action or proceeding arising under this Annexation Agreement shall be in Lake County, Florida. This Annexation Agreement shall be construed in accordance with the laws of Florida. In the event of any litigation arising under this Annexation Agreement, the prevailing party shall be entitled to recover its reasonable court costs and attorneys' fees at both the trial and appellate levels, in addition to any other relief obtained.

**IN WITNESS WHEREOF**, the parties have caused their duly authorized officers to set their hands and seals to this Annexation Agreement.
